Indian Companies have, over the last decade, demonstrated capability to expand their mind sets and operations. Many Corporates have adopted strong governance practices and are ready for rapid growth to the next level which would require stronger execution capabilities, especially given the fact that most of the Companies have ambitious global plans. Furthermore, there are billions of dollars that have been invested in creating new capacities. Indian Corporates will have to ensure that these capacities deliver on the promise. MANAGEMENT DISCUSSION AND ANALYSIS

Economic Scenario

India has now steadfastly established as an important place in the World Economy. The economy continues to grow at an impressive pace - industrial growth rate at over 13%, GDP marching well towards the 10% mark and foreign investors moving in rapidly to set up their base confidently in the Indian market place. The financial services sector has shown a steady growth at 11%.

Indian Corporates are also on the move, whether in Telecom, Retail, Real Estate, SEZs or the Information Technology and the Financial Services sector - the growth has picked up momentum. A new trend is being seen in the Indian Corporate scenario and that is of consolidation in various sectors viz. Telecom, Steel, Cement, Retail and Infrastructure. The emergence of the SME segment and moving towards a bigger growth story are the effects of a strong and fast developing economy, which is now sustainable and appealing.

The Foreign Direct Investment in the last financial year was US\$ 15 billion and in the ongoing fiscal the Government has targeted the same at US\$ 25 billion. The annual FII investment portfolio in India has crossed US\$ 5 billion and the gross FII investment in the country till now, from the time they were allowed to invest in the Indian equity market, stands well over US\$ 50 billion. The Foreign exchange reserves have crossed US\$ 200 billion adding strength to the economy.

The Indian primary market has also come of age and can easily absorb the current US\$ 12 billion worth of fresh paper coming into the market. Going by the past, the primary market has demonstrated to the Indian Corporates that the capital market has sufficient liquidity to help meet their aspirations for growth and can easily repeat it - All this augurs well for the economy. The emergence of Private Equity players in the Indian horizon with investments being made across the sectors have helped India Inc to pace their growth faster.

On the global side, Indian Companies are well placed as compared to their Asian counterparts. As per a recent research report by a leading foreign brokerage firm, India and China represent the future of the global economy. Both economies now need to fine-tune their development strategies by expanding their economic power bases, which could play an increasing role in driving global growth for the respective nations in the years to come.

Besides this, in a bullish economy, these services are further challenged by various new entrants and economic, monetary and primary market behavior.
